Hi Mr. Kennedy,

Thanks for the message. We took notes and will prepare accordingly.

I was on the phone with Mr. Phong Le from your Police Liaison team a moment ago.

He was reporting some movement on-site as we were speaking. Apparently, the protesters are moving out (but to what extent? seems I hard to predict at this time).

Does that change the plan? If yes, please keep us in the loop.

Pat

Hi Patrick

Nice talking to you today.

There are four things being addressed in this message:

- 1 – letter to be served on the people being evicted
- 2 – fencing requirement
- 3 – NCC support vehicles and staff to remove any property remaining on site
- 4 - longer term security requirement

1 - Letter to be served on the persons occupying the park

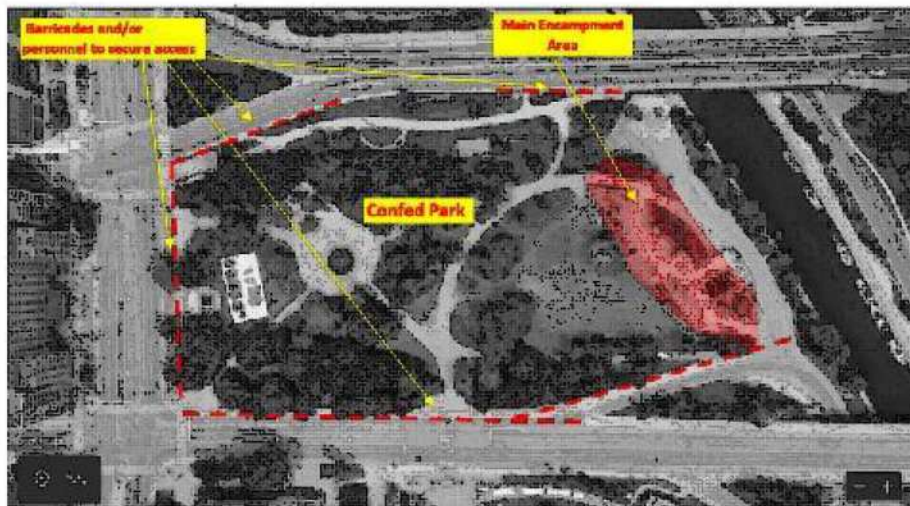

We'll need a written notice served on the people encamped in the park to vacate by an identified date or they may be subject to removal/arrest by police. The date and time on the letter should be no later than 0800 hrs on Monday morning. We'll need that served on them and posted at the access points to move forward with the eviction. We'll accompany the CO or whoever else from the NCC when the occupiers are served. Just let us know when you would like to go.

2 – Fencing requirement

Once we remove people from the park (*it will be the whole park*), it will be held for a period of time by police so the groups don't return and re-establish their encampments. To assist us in holding it,

we'll need fencing erected around the park. I've attached the map below and in it you'll see a red dotted line where fencing will need to be placed. Essentially, it's anywhere where the park meets ground level sidewalks. The fencing will also have to be installed at the top of the stairs on Mac Bridge.

If you can get the 6' modulock that would be perfect. The other option is for you to reach out to Bryden Denyes from the city and see what bicycle fencing is available. Whatever the case, the fencing will have to be interlocked so that anyone trying to enter is forced to climb over.

3 - NCC support vehicles and staff to remove any property remaining on site

This should be an immediate requirement before our larger deployment leaves the site. Any property remaining on site will need to be removed and stored by NCC. I suspect people will want their property back but we can't be waiting around for them to pack it up themselves...that will delay the process and cause a potential opportunity for other occupying supports to arrive. With proper notice (the first point) they will have had ample opportunity to move out before we arrive. Your crew will need to be able to deal with the flammables and hazardous materials on site. If you feel fire is also required, please advise.

4 – Longer term security requirement

Once we hand it back to NCC, there will need to be a longer term security component (CO's or private security) to prevent a return until this occupation has ended. Without that, I fully expect they will try to take it back again.

Let me know if you need more. Also let me know by cell (my emails are jammed) when you might be able to serve the letter on the occupants. I'll arrange support from our end for your people during this service. My cell is 613-724-0137.

Tks

K
